NORSK LUFTFARTSMUSEUM

WELCOME TO NORSK LUFTFARTSMUSEUM

Norsk luftfartsmuseum
(The Norwegian Aviation Museum)
opened in 1994 and is Norway's
national museum for aviation history.

The museum is located in Bodø in a building shaped like a giant propeller, and covers military and civil aviation history. The museum is spread over roughly 10,000 square metres of floor space. The exhibition is the largest in the field of aviation in the Nordic region.

Supermarine Spitfire LF.MK.IX

AN AERIAL EXPERIENCE

Experience the exciting history of aviation at close quarters. See famous and illustrious military aircraft such as the Spitfire, CF-104 Starfighter, Ju 88 and the U-2 spy plane, or workhorses and passenger aircraft like the Ju 52, Twin Otter and F.28. These aircraft linked Norway together and brought the world closer to us.

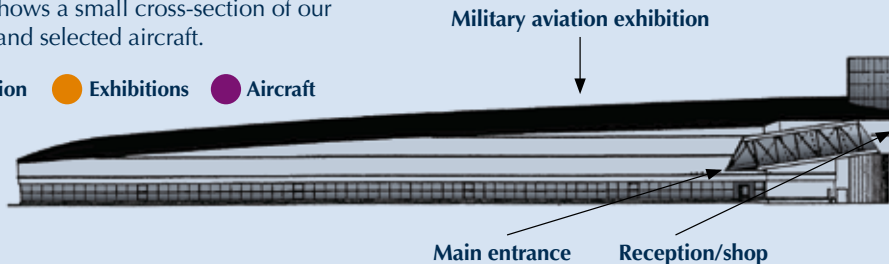

Why not fly to the Mediterranean through our new exhibition presenting the history of package tours and charter flights? Play and learn in our “How do we fly?” section. Want a hair-raising experience? Then take a spin in our flight simulator – if you dare!

Join one of our expert guides on a guided tour during the summer, with special tours for children – both educative and fun. Visit the control tower with its spectacular views over the city and airport, and follow the day's flights and air traffic first hand!

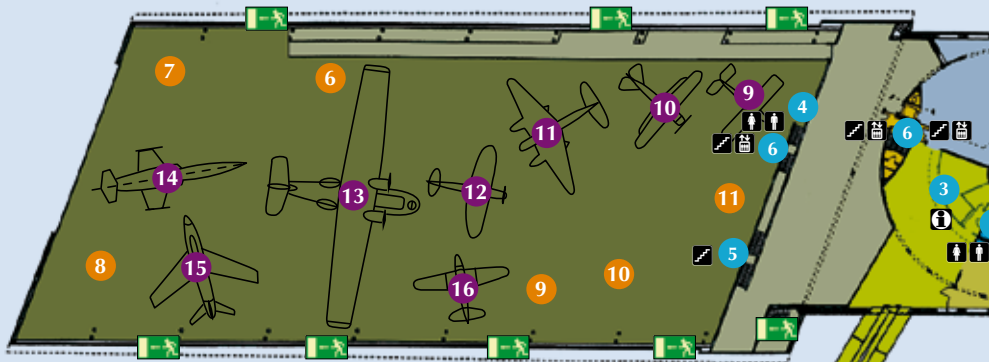

MINIGUIDE

This guide shows a small cross-section of our exhibitions and selected aircraft.
